- Data Structures and Algorithms
- Database Management

Web development:

- HTML and CSS
- JavaScript/TypeScript and frameworks:
 - React
- WordPress

Other:

- Git Hub
- Microsoft Office
- Project Management
- Product Management

LANGUAGES

- Serbian
- English

PROFILE

Motivated and dedicated student at the Faculty of Organizational Sciences, pursuing an Information Systems and Technologies degree.

With almost a decade of coding experience, I have honed strong programming skills and understanding. My academic background also includes knowledge in management, economics, finance, project management, etc.

I am actively seeking an entry-level position in IT where I can gain practical work experience, and grow professionally in a collaborative and supportive environment. Eager to contribute and learn from more experienced mentors and colleagues.

EXPERIENCE

Academic Projects:

Seminar Coding Project on Java Technologies 2024 - 2025

- Designed and developed a server desktop application for tracking car sales using Java as part of a seminar project on a Software Development course.

Seminar Coding Project on Fitness Web Application 2024

- Developed and deployed a Dockerized web application for tracking workout plans using TypeScript and React front-end framework as part of a seminar project on a Client-Side Web Technologies and Scripting Languages course.

Seminar Coding Project on Python and Google Speech API 2022

- Developed a Python-based voice-controlled music assistant using the Google Speech API as part of a seminar project on an E-Business course, showcasing my creativity and eagerness to learn and research independently.
- Recognized as one of the top 10 projects of the year by the Department of E-Business
- Invited as a guest on the Department of E-Business's podcast to present the project. (note: the podcast was recorded but sadly never published)

Side Projects:

Nordeus Full-Stack Challenge 2024

- Built a Dockerized web game using JavaScript and React as part of a Nordeus Full-Stack Challenge 2024, showcasing my logical thinking and understanding of matrix-based algorithms.

Portfolio Website 2024

- Designed and launched a static, client-side personal portfolio website hosted on GitHub Pages using pure HTML, CSS, and JS demonstrating my understanding of fundamental web technologies as well as my design skills.

Note: All my projects are available on my GitHub profile.

EDUCATION

Information Systems and Technologies 2022 - 2026

University of Belgrade, Faculty of Organizational Sciences, Belgrade

- Participated in an advanced Java course offered by the Software Engineering Department 2024
- Attended ELAB summer school course on Digital Product Management offered by the E-Business Department (Certified) 2024

Electrical Technician in Information Technology 2018 - 2022

Technical School "Valjevo", Valjevo
