ABOUT ME

Information Systems and Technologies student at the Faculty of Organizational Sciences, University of Belgrade, with experience in frontend and backend software development, e-business applications, and project/product management. I aim to contribute to the development of practical, impactful software that enhances people's daily lives.

EDUCATION

Bachelor of Information Systems and Technologies University of Belgrade, Faculty of Organizational Sciences	2022 - present
Electrical Technician in Information Technologies Technical School "Valjevo"	2018 - 2022

EXTRACURRICULAR ACTIVITIES

ELAB summer school 2024 Attended ELAB summer school course on Digital Product Management offered by the E-Business Department	Sep. 2024 - Oct. 2024
Advanced Java course Participated in an advanced Java course offered by the Software Engineering Department	Feb. 2024 - Jun. 2024

PROJECTS

Chat Application - PHP(Laravel), TypeScript(React) Web Application built using the Laravel PHP framework on backend and React TypeScript framework on frontend, enabling real-time communication between two users. Some of the features: - Real-time messaging between users via WebSockets. - Implemented RESTful API architecture for seamless client-server communication. - Managed a small team, ensuring the agreed-upon deadlines are met. - Seminar project in a Server-Side Web Technologies course, graded 40/40 points.	Sept. 2025 - Oct. 2025
Car Sales Tracking Application - Java, MySQL Desktop Client-Server application developed in a Java environment using simplified Larman's methodology as an architectural approach. Demonstrated an understanding of the fundamental object-oriented programming principles, as well as proficiency in network programming using sockets and multithreading. Some of the key features: - CRUD operations for various types of entities, including strong, weak, and associative entities. - Applied different patterns to produce a clean, maintainable, and well-structured code, including the MVC, the Template Method, and the Singleton patterns. - Authored documentation covering five phases: requirements gathering, analysis, design, implementation, and testing. - Seminar project in a Software Development course, graded 30/30 points.	Nov. 2024 - Jul. 2025
Fitness Tracking Web Application - TypeScript(React), Node.js, Docker Dockerized full-stack Web Application developed using the Express , Node.js framework, on backend and React , TypeScript framework, on frontend, enabling users to log their workouts and track progress. - Input of workout data, such as the number of sets, reps, and lifted weight, and their analysis through the generated charts. - Wrote multiple tests using the Vitest framework. - Seminar project in a Client-Side Web Technologies course, graded 40/40 points.	Jul. 2024 - Aug. 2024
Voice-Controlled Music Assistant - Python Created a Python -based music assistant that responds to voice commands to play songs on YouTube. - Implemented SpeechRecognition library for speech-to-text conversion and Google Speech API for text-to-speech feedback. - Seminar project in an E-business course, graded 30/30 and recognized as one of the top 10 projects of the year by the Department of E-Business	Dec. 2022 - Jan. 2023

Additional academic and personal projects are available on my [GitHub profile](#) and [Portfolio Website](#) linked above.

SKILLS

- Programming Languages:** Java, TypeScript/JavaScript, Python, PHP, C#, C
- Frameworks:** Spring(Java), React(TS/JS), Laravel(PHP), Express(Node.js)
- Management:** Project management, Product management, Economics and Finance

O MENI

Student završne godine Fakulteta Organizacionih Nauka, Univerziteta u Beogradu sa iskustvom u frontend i backend razvoju softvera, razvoju veb aplikacija e-poslovanja, kao i u upravljanju projektima i proizvodima. Želja mi je da doprinesem razvoju praktičnog, profesionalnog softvera koji olakšava svakodnevni život ljudi.

OBRAZOVANJE

Inženjer Informacionih Sistema i Tehnologija	2022 - trenutno
Univerzitet u Beogradu, Fakultet Organizacionih Nauka	
Elektrotehničar Informacionih Tehnologija	2018 - 2022
Tehnička škola "Valjevo"	

VANNASTAVNE AKTIVNOSTI

ELAB letnja škola 2024	Sep. 2024 - Okt. 2024
Pohađao ELAB letnju školu na kursu Upravljanje Digitalnim Proizvodima koju organizuje Katedra za Elektronsko Poslovanje.	
Napredni Java kurs	Feb. 2024 - Jun. 2024
Pohađao napredni Java kurs koji organizuje Katedra za Softversko Inženjerstvo.	

PROJEKTI

Čet aplikacija - PHP(Laravel), TypeScript(React)	Sep. 2025 - Okt. 2025
Veb aplikacija razvijena pomoću Laravel framework-a na backend-u i React framework-a na frontend-u koja omogućava komunikaciju u realnom vremenu između korisnika. Neke od karakteristika projekta:	

- Razmena poruka u realnom vremenu putem **WebSocket**-a.
- Implementirana **RESTful API** arhitektura za komunikaciju između klijenata i servera.
- Upravljaao timom za izradu aplikacije, osiguravajući da se ispoštuju dogovoreni rokovi.
- Seminarski projekat na predmetu **Serverske veb tehnologije**, ocenjen sa 40/40 poena.

Aplikacija za praćenje prodaje automobila - Java, MySQL	Nov. 2024 - Jul 2025
Desktop Client-Server aplikacija razvijena u Java okruženju korišćenjem pojednostavljene Larmanove metode . Pokazao razumevanje osnovnih principa objektno-orijentisanog programiranja kao i spretnost u mrežnom programiranju u radu sa socketima i nitima. Neke od karakteristika projekta:	

- CRUD operacije za različite tipove entiteta, uključujući jake i slabe objekte, kao i agregirane objekte.
- Primenio više **paterna** kao što su MVC, Template Method i Singleton paterni kako bih obezbedio čist, skalabilan i dobro strukturiran kod.
- Napisao **dokumentaciju** koja pokriva pet faza: prikupljanje korisničkih zahteva, analizu, projektovanje, implementaciju i testiranje.
- Seminarski projekat na predmetu **Projektovanje softvera**, ocenjen sa 30/30 poena.

Fitnes veb aplikacija - TypeScript(React), Node.js, Docker	Jul 2024 - Avg. 2024
Dokerizovana full-stack veb aplikacija razvijena korišćenjem Express framework-a na backend-u i React framework-a na frontend-u koja omogućava korisnicima da beleže odrađene treninge i prate svoj napredak. Neke od karakteristika projekta:	

- Unos podataka o treningu kao što su broj serija, ponavljanja i podignuta kilaža i njihova analiza putem generisanih grafikona.
- Napisao više testova putem **Vitest** framework-a.
- Seminarski projekat na predmetu **Klijentske veb tehnologije**, ocenjen sa 40/40 poena.

Muzički asistent - Python	Dec. 2022 - Jan. 2023
Muzički asistent razvijen u Python programskom jeziku, koji reaguje na glasovne komande za reprodukciju pesama sa YouTube-a.	
Implementirao SpeechRecognition biblioteku za konverziju govora u tekst i Google Speech API za pretvaranje teksta u govor.	
Seminarski projekat na predmetu Elektronsko poslovanje , ocenjen sa 30/30 poena i izabran u najboljih 10 projekata godine od strane Katedre za Elektronsko poslovanje.	

Više mojih akademskih i ličnih projekata možete pogledati na mom GitHub profilu ili portfolio sajtu navedenim iznad.

VEŠTINE

- Programski jezici:** Java, TypeScript/JavaScript, Python, PHP, C#, C
- Frameworks:** Spring(Java), React(TS/JS), Laravel(PHP), Express(Node.js)
- Menadžment:** Upravljanje projektima, Upravljanje proizvodima, Ekonomija i Finansije
